5 QUICK THINGS

Before We Start.

- 1 **Be present.** Close the other tabs. This only works if you actually do it with us.
- 2 **Stay to the end.** We are going to be dropping links of value through the whole session.
- 3 **Interact in the chat.** Hit that thumbs up emoji, fire emoji.
- 4 **Take notes.** We move fast. You might need to take photos with your phone.

Five tools. *Everything you need.*

- 1 **Google Business Profile (Free)**, Your GEO foundation. The first place AI looks when it builds a profile of you.
- 2 **Claude Pro**, Writes your GEO blog content in minutes. Trained on your voice, your market, your specialty.
- 3 **GitHub (Free)**, Hosts and versions your GEO blog. No coding required once it's set up.
- 4 **Netlify (Free)**, Publishes your blog live instantly. Every post becomes a new AI citation opportunity.
- 5 **An AI visibility audit tool (Free)**, Run a baseline audit to see exactly how AI currently sees you in your market. Know where you stand before you optimize.

- The single Google Business Profile setting that triples your odds
- The 30-second daily action that compounds into total AI authority

What does the *Data* say?

THE DATA

Buyer research is moving to AI. *Fast.*

BUYER AGENT-RESEARCH TRAFFIC TO AI TOOLS: 17% TO 67% IN 18 MONTHS · YAHOO FINANCE · FLYDRAGON 2026 BENCHMARK REPORT

THE DATA

67⁰%

of home buyers now use AI as their *primary research tool*, up from just 17% eighteen months ago.

91⁰%

of U.S. agents are *effectively invisible* in the AI search engines their buyers now use first.

4.2_x

higher close rate from AI-sourced leads: 70% close within 30 days vs 2.4% on Zillow Premier Agent, in about half the time.

33.8⁰%

Zillow's share of agent-discovery traffic, *down from 41.2%* year over year, its first decline since 2024 as the loss moves to AI.

The Problem & *The Secrets*.

What most agents are getting *wrong right now.*

- **Inconsistent name & info across platforms.** AI triangulates your identity from 10+ sources. One mismatch and it loses confidence in you, and skips you.
- **Generic bio language.** "Passionate, dedicated, results-driven" means nothing to AI. It needs specific, structured claims it can actually quote and cite.
- **No Q&A content on your Google Business Profile.** The single most-missed signal in every visibility audit we run. It's free, takes 20 minutes, and almost no one has done it.

THE PROBLEM

When they ask AI *"who's the best agent in my area?"*
Only one name comes up.

Not the agent with the most listings. Not the one spending the most on ads. Not the one with the biggest Zillow budget. **The one AI can actually see.**

Everyone else? Invisible. That's the Invisible Agent Problem.

THE COST

Every day you're invisible, *those leads go to someone else.*

- The buyer asking AI for a first-time-buyer specialist
- The seller asking which agent gets the most for lakefront homes
- The out-of-state investor looking for someone who knows the metro

They're all getting an answer right now. The only question is whether it's your name.

WHAT THEY AREN'T TELLING YOU

Three secrets are keeping you invisible.

Let's break all three.

SECRET #1 · THE VEHICLE

It's *not* about more ads, more Zillow, or more cold calls.

You've been told the answer is to spend more and grind harder. But AI doesn't care how much you spend. It cares about specific signals most agents have never heard of. **GEO, Generative Engine Optimization, is the new vehicle.** And it's nearly free.

SECRET #2 · INTERNAL BELIEF

You *don't* need to be technical to do this.

No code. No agency. No \$3,000/month consultant. If you can open ChatGPT and edit your Google Business Profile, you can run this entire framework yourself. We designed it for working agents, not engineers. Tyler made the hard part invisible.

SECRET #3 · EXTERNAL BELIEF

It's *not* too late, and you're *not* too small.

Almost nobody in your market has done this yet. That's the opportunity. A 2-year agent became the AI's top pick for "best first-time home buyer agent in [her city]" in 9 weeks, starting from zero. First mover wins. Right now, that can be you.

THE FRAMEWORK

The 5-Step *GEO Framework*.

The exact system Pemberton agents are running to become the #1 AI recommendation in their zip code.

RUNNING IT RIGHT NOW

Shout out to *Randa* and *Wes*.

Two Pemberton agents running this exact framework right now. Here's Randa, getting picked by ChatGPT in the wild:

ChatGPT picks Randa first in Crosslake, MN

And again across the Brainerd Lakes Area

Her message: a \$1.3M buyer found her through ChatGPT

01

Claim Your Entity

Make sure AI knows who you are. Lock down a consistent name, role, market, and specialty everywhere AI looks: Google Business Profile, your site, your socials, your brokerage page. AI builds a profile of you from these. Conflicting or thin info = invisible.

The *exact words* AI needs to know about you.

THE TEMPLATE

"[Full Name], REALTOR®, is a licensed real estate agent in [State] serving [City/Area]. [He/She/They] work with [buyer or seller type] looking for [need or price range]."

REAL EXAMPLE

"Sarah Chen, REALTOR®, is a licensed real estate agent in Minnesota serving Plymouth and the northwest suburbs. She works with first-time buyers searching for homes under \$450K."

Copy this exact phrase to your GBP description, website bio, and all social profiles. **Verbatim. Everywhere.**

02

Feed the Signals

This changed. ChatGPT now integrates directly with Zillow and Realtor.com, your Zillow review count and recency are live signals feeding AI recommendations right now. We adjusted how we teach this.

USED TO SAY

Ask for Google reviews first

NOW WE SAY

Ask for Zillow *and* Google reviews

GBP still has one setting most agents miss: the **Questions & Answers section**. Add 5–8 keyword-rich Q&As. Free. Takes 20 minutes. Almost no one has done it.

And of course, *never stop creating GEO-optimized content.*

03

Answer the Questions

Buyers and sellers ask AI in full sentences. Create content that matches exactly how they ask: "best agent for X in [city]", "who should I call to sell my lake home." Answer those questions in plain language and AI starts quoting you.

04

Build Authority

AI recommends sources it trusts. Get cited on the local pages, directories, and publications AI already reads. A handful of the right mentions outranks a hundred of the wrong ones.

05

Compound Daily

The 30-second daily action that compounds into total AI authority over a season. Small, consistent signals beat one big push. We'll give you the exact daily move.

THE FRAMEWORK

Five steps. *One outcome.*

- 1 Claim your entity
- 2 Feed the signals
- 3 Answer the questions
- 4 Build authority
- 5 Compound daily

Run all five and AI stops skipping you. It starts naming you.

Let's see GEO *working for you.*

THE RESULT

From invisible to *the top recommendation.*

The same five steps, running on real agents in real markets. Repeatable, and working right now across our network.

"1.3 million dollar buyer who found us through a ChatGPT search yesterday. **IT WORKS.**"
